CRAVEN'S CHARGES

He Tells the Committee More About the Aqueduct.

\$10,000 of City Money Said to Have Been Squandered.

The Committee Smiles and Intimates That There Are Startling Developments That May Be Sprung at Any Moment-Craven Tells About the Needless Use of Timber and Its Subsequent Throwing Out.

Engineer Alfred Craven, whose 'testimony last Saturday beforeSenator Fassett's committee, which is investigating the affairs of the new Aqueduct, had the affect of a big dynamite bombshell in the camp of the contractors and sub-contractors, was recalled as a witness when the committee reassembled this morning in Part III. of the Supreme Court.

Senator Fassett was on hand bright and early, and before 11 o'clock Senators Van Cott, "Hendricks and McNaughton had arrived to keep him company. Senator Pierce is still ill at his house in Brooklyn and unable to attend the sessions of the committee.

The Chairman said that the committee had not by any means finished with Mr. Craven, and hinted in a knowing manner that still more startling revelations in regard to the mismanagement of the work on the new Aqueduct and the irregularities of those engaged in its construction might be expected.

When Engineer Craven took the stand first in answer to Mr. Boardman's questions he said that after the reorganization of the Board he had had frequent differences of

Board he had had frequent differences of opinion with Engineer Church in regard to the work. The first one he remembered was in regard to the timbering and excavation of about 400 feet near shaft 16.

"Mr. Pugsley, the Chief Assistant Engineer," said the witness, "asked me to report the cost of timbering and also of excavating the section in question.

Q. What did you reply? A. I told him that it was not necessary, as the ground was good and the excavation had stood for a year without any danger, and there was no need of putting in timbers.

Mr. Craven also mentioned one or two occasions in 1886 and 1887 when the same dispute came up, and he always reported it un-necessary. The timbers were put in, how-ever, and the work was paid for as a full tim-bered section. The difference to the city was

about \$10,000.

"Following these reports," the witness said, "charges were brought against me for mcompetency and unreliability by Mr. Pugsley and the Chief Engineer. I was summoned

ley and the Chief Engineer. I was summoned to answer them before the Aqueduct Commissioners. The charges were so general that I demanded further specifications."

Mr. Boardman read these charges by Mr. Pugsley in which it was said that he had disturbed the harmonious arrangement of the engineering department by refusing to obey orders and to furnish certain data for estimates for the engineer mouth the for severe mates for the ensuing mouth. He recom-mended his dismissal. Engineer Church in-dorsed this report and approved the request for Mr. Craven's dismissal.

Q. Was a hearing held on these charges? A. There was. It lasted through one afternoon. Q. What was the result? A. I never received any report of the hearing. The investigation was stopped and Mr. Pugsley resigned soon after. Immediately after this investigation the

would not allow it, in spite of the complaints of the contractors.

"Several contractors spoke to me about it, including Mr. O'Brien and Mr. Clark, but I told them I would not allow it unless instructed to do so by the Board. About six months afterwards I received an order from Chief Engineer Church to allow for the timberian.

Q. Then it was first allowed and paid for, then disallowed and taken out of another estimate and finally allowed again? A. Yes, sir.

Visited His Own Grave

[From the Savannah Neme,]
Recurring to soldier graves, a most remarkable incident, and one which is well attested, is the case of a Union soldier who had been in Sherman's army, and while passing through North Georgia army, and while passing through North Georgia stopped at Marietta to visit the cemetery grounds of his comrades. Imagine his astonishment to find there his own grave, plainly marked on the records with his own name, with his company, regiment and State. That man must have felt for a moment like a Rip Van Winkle, but he finally solved the mystery in this way!, A shell had taken off the head of the man who stood adjoining him in battle, and he had cottained a furlough the next day and gone off, and his comrades, missing both men, had mistaken the mutilated body of his comrade for his own and marked the grave with his name.

POLITICS LED TO THE MURDER.

Mall Clerk Sellon Said to Be Responsible tor Sinclair's Death. ISPECIAL TO THE WORLD.

Bancon, June 11 .- The mystery attending the murder of United States Postal Clerk Jere. G. Sinclair Saturday night will probably be cleared up at once.

The two fellow-mail clerks-A. G. Sellon. of North Easton, Mass. and L. Lyman Hayes, of Milton, N. H.—were arrested and locked up here to await the Coroner's inquest. Hayes has made a statement implicating A. G. Sellon, the third mail clerk employed in

Although the officials are very reticent, the truth has come to light.

The despatch sent by Marshal Whitney, of Bangor, to Marshal Morse, of Augusta, to arrest the two mail clerks, Sellon and Hayes, was received just in time to do its work. The Augusta Marshal and Officer Breen met the train when it arrived at Augusta and immedistely arrested the two men.
Sellon asked if it was on account of the man who died of hemorrhage at Bangor.
When told that he guessed right Sellon said

Hayes, however, talked quite freely, although at that time he made no remark which would implicate his companion or himself in the horrible crime.

On the arrival of the next train the officers brought the two men to Bangor. They were taken to the police station, and Sellon was locked up.
The officers did not think it advisable to lock Hayes up, as the station is so small that the two men could have communicated with each other, so Hayes was taken to the Penob-

scot Exchange under the charge of an officer. He employed as counsel Lawyer John F. Robinson, of this city. After a consultation, during which Robinson urged upon his client the necessity of telling what he knew in order that he might clear himself. Hayes made a clean breast

of it.
The statement is withheld until the Coroner's inquest. Sellon is under close surveil-lance, while Hayes is allowed nuch freedom. From the most reliable sources the follow-ing brief synopsis of Hayes's statement has n obtained

been obtained:
Hayes says that after Sinclair had taken
his mail pouches he began to talk with
Sellon. The conversation turned on politics,
and here the two men differed. What particular question they were discussing is not known. Hayes was in his end of the car, sorting

mail. The words became very hot, and the next he (Hayes) knew there was a struggle, and he saw Sellon seize the knife which is used by the clerks for cutting twine and plunge it into Sinclair's breast.

Gum Keeps the Teeth White.

[From the Cincinnati Times-Star.]
"Have you ever noticed that ladies from the outh have singularly white teeth?" asked a Sevnth street dentist.

Whiter than those of Northern girls ?" . Yes. "

Why is it?" "Because they are such eternal chewers o gum. They chew gum almost universally, and gum, you know, is a great cleanser of the teeth. It takes away from them all the fittle particles that auses decay and which discolor the teeth. The teeth of gum-chewers, I find, are always clean and week. Cometimes when a man comes in who is sweet. Sometimes when a man comes in who is a stranger to the tooth-brush, I feel like giving him a big gob of spruce gum and teling him to chew it steadily for an hour. At the end of that time has teeth would be in a condition for a self-respecting man to handle them."

An Untimely Hymn. [From the Philadelphia Times.]

A Baltimore excursion party came near being broken up on Saturday through a curious cause. The Baptist church had hired a steamer to go up the bay, and it was crowded to the brim with merry excursionists. On the way out the boat stopped a moment until some machinery could be renaired, and the band which was on board, with a strange disregard of what was appropriate under the circumstances, began to play 'Nearer, My God, to Thee," in the most doleful manner. The people became thoroughly frightened and imagined that their last hour had arrived. A panie was about to easne, but the captain, with presence of mind, let off the steam whistle and drowned the inwelcome hymn.

Swallows on Shipboard.

[Paris Despatch to London Telegraph.]
A rather curious episode in natural nistory oc curred the other day on board the French steam coat Abd-el-Kader during the passage from Marscilles to Algiers. Just as the vessel was about two hours out the skies became quite black with wallows. It was then about 6 o'clock in the even ing. The birds alighted in thomands on the same, ropes and yards of the Abd-el-Kader. After a perky survey of the deck from their eminences aloft they descended coolly on deck, hopped about among the sailors and passengers and eventually found their way into the cabins both fore and aft. The birds were evidently fatigued, after a long flight, and silowed themselipes to be caught by the people of the saip, who gave them a welcome reception and provided them with food, which they enjoyed heartily. The little winged strangers remained all night on the vessel and in the morning at 7 o'clock the head lookout bird had, no doubt, signited the Halestric lies, for the whole foods made for land, after having spent a comfortable and refreshing night on board ship. ing. A number of stationmen who had their caps destroyed in the recent fire at One Hundred and Twenty-ninth street entertained the hope that the company would make an exception in their favor and make them a present of new caps. The hope was utterly vain, however.

Whatever dissatisfaction the men felt at this additional burden they were obliged to mask under smiling-faces.

"The Evening World's " Free Leoture Bill a Law.

Gov. Hill Once More Gives Help to the Wage-Workers.

An Able Method Through Which Workers May Be Educated.

THE FULL TEXT OF THE BILL

[SPECIAL TO THE WORLD] ALBANY, June 11.-Gov. Hill signed on Saturday THE EVENING WORLD Free Lecture bill introduced by Senator Reilly, and the first announcement of his action is made this morning.

With most pardonable pride THE EVENING WORLD records this further legislative victory in the interest of the people.

The Saturday half holiday stands. And now the Free Lectures, of inestimable value to the masses, are assured. A varied and ingenious opposition has been made to the Free Lecture bill, the most pointed, as well as the most specious allega-

tion against the measure being that it was nandatory in its nature. At every point, however, the opponents of the bill heve been met with straightforward counter-arguments, and the real value of the proposed movement has been clearly shown. The victory comes as a proud tribute to the perseverance and statesmanly qualities of

Senator Reilly; to the depth of Gov. Hill's

nterest in his vast constituency; to the effectiveness of THE EVENING WORLD's forces on the right side of a great popular question. With its finger constantly on the pulse of the people, THE EVENING WORLD, like the good physician it means to be, advocates the best of remedies for the ill and the conplescent, giving, meanwhile, serious atten-

tion to the preservation of health not yet affected. When the people are well in body and in

mind the State is well also. With the right carrying out of the spirit of this Free Lecture bill, now to stand as a law. there will be placed by the side of the public school system another most effective aid to

Acknowledging with all modesty the congratulations received over this latest good fight won, THE EVENING WORLD yet feels its own glow of satisfaction, which is of self, but not selfish.
